# Sample Setup for 1 iPad using Lemur Daemon

In this setup I am designating:

- Target 0 for Composer Tools Pro
- Target 1 for C\_brains
- Target 2 for MK Transport
- Target 3 for MK Connect

Since all the products will be installed on the same iPad, they can all share the same connection to MK Connect.

## **Composer Tools Prefs:**

Composer Tools Pro Target:

Input: 0 Output 0

MK Connect Target:

Input: 3 Output: 3

#### C\_brains Prefs:

C\_brains Target:

## Device Setup: MIDI Port Setup

Make sure to include Daemon Input 0 in your "In All MIDI" devices. This where Composer Tools Pro will send its performance controls-- you want to record this stuff onto your tracks! Logically then, you want to *deselect* all the others. You DON'T want to record C\_brains & MK Transport MIDI data onto your tracks.

Device Setup: C brains Generic Remotes (both)

MIDI Input: Daemon Input 1
MIDI Output: Daemon Output 1

Device Setup: MK Transport Generic Remote and Mackie Control

MIDI Input: Daemon Input 2 MIDI Output: Daemon Output 2

Composer Tools Pro Recall Send (where you send the Transformer on each track)
